Incoming Software Engineering Intern

MICROSOFT

Summer 2021

Remote

Cybersecurity Intern

GRUPO FINANCIERO BANORTE

Jan 2020 - Jul 2020

Mexico City, Mexico

- Built and deployed a dashboard to help assess cybersecurity risks that affect the institution in a day-to-day basis
- Created several graph and hierarchy visualizations rendered with the help of React and D3.js
- Developed Python scripts to clean and transform the data from Excel spreadsheets to a variety of JSON and CSV files for easier use in the web app
- Had a hands-on experience on how companies defend their assets against malware and other cyber-threats

Education

B.S. Computer Science and Technology

TECNOLÓGICO DE MONTERREY

Aug 2018 - Exp. Dec 2022

Mexico

- Currently in my sixth semester, with a GPA of 96/100
- Participated as a teaching assistant on our Competitive Programming Club for a year
- Relevant coursework: Data Structures, Operating Systems, Analysis and Design of Algorithms, Programming Languages, Advanced Database Systems, Web Applications Development, Software Quality and Testing

Software Projects

Web application for Dauverre A.C.

A WEB APP WITH SERVERLESS ARCHITECTURE USING FIREBASE

🐙/KevinTMtz/DauverreWeb

Sept - Dec 2020

- My team and I developed an application with the objective of creating a platform where the relatives of the residents could consult reports on how the elderly were doing, in addition to publicizing the nursing home
- Frontend written in React with TypeScript, using Material-UI components and react-router-dom
- Executed concurrency and security-sensitive actions using Cloud Functions (Firebase's serverless framework)
- Took advantage of GitHub Actions to verify every pull request and also continuously deploy to Firebase's Hosting

Resume and portfolio

LATEX PDF AND REACT APP COMPILED FROM THE SAME DATABASE

🐙/MarioJim/ResumeAndPortfolio

Since September 2019

- Wrote TypeScript packages for compiling the data to a static React website and to a PDF document
- Encapsulated my development environment within a Docker container so that it can be easily replicated and used with Visual Studio Code and the Remote - Containers extension
- Website automatically deployed and hosted on GitHub Pages (mariojim.github.io)

Skills

Languages

JavaScript/TypeScript (proficient), Python (fluent), Java, C++, C, Rust, SQL (MySQL/MariaDB)

Frameworks

React, Express, Flutter

Tools & Platforms

Git, GitHub Actions (CI/CD), Docker, Firebase, Node.js, Chrome DevTools

Additional Experience and Awards

First place in Banorte's Challenge at HackMTY 2019

MONTERREY, MEXICO

August 2019

- Developed an Android app prototype that accurately blocks phishing links and ads
- Competed against about 100 teams in Mexico's largest student hackathon
